Data extraction and analysis from social media platform Youtube

Problem statement

Videos are a fast growing medium where people communicate, share knowledge, showcase skills etc. YouTube is one of the biggest platforms which hosts videos. The YouTube platform hosts content from many different professions/arts/ cultures across the world.

People can express their opinion about the video in the form of likes, dislikes, comments which are features provided by the YouTube platform which provides the information on the sentiment about the video.

The assignment involves the steps on programmatic data extraction from YouTube on which analysis can be conducted to understand various attributes related to a video.

Steps to be performed

1. Connect to the Youtube API using a Python client

1.a Create a YouTube API key

```
[1]: # Steps to Obtain a YouTube API Key:
# 1. Navigate to the website: https://console.cloud.google.com/
# 2. Create a new project and begin the setup for the subsequent steps.
# 3. From the left dropdown in the Navigation menu, choose "APIs & Services" >>
    ↳ "Library."
# 4. Search for "YouTube Data API v3" and activate it.
# 5. Proceed to "APIs & Services" > "Credentials" and generate your API Key.

# api_key = "AIzaSyBXoUg_omywBIVcpgTXaESBhCqzQEQKmOE"
```

1.b Install the Google API python client

```
[2]: pip install --upgrade google-api-python-client
```

3.b Use a suitable method to retrieve comments of those top 10 videos from 3.a. For doing this, write a program to loop through each video id from 3.a and pass in the part parameter set to “snippet”, to retrieve basic details about the comments. Execute this request and print the response using the pprint() method. - Note: pprint() will print out the response from the API in a more human-readable format. - Reference link: [link](#)

Output expected : Use the python library “ pprint “ to print the output of the program with the following properties etag, items, id , kind, snippet and snippet to have the text display field which represents the comment of videos.

```
[6]: # (3.b)
# Collecting data for top 10 video id's from (3.a)

IOPub data rate exceeded.

The Jupyter server will temporarily stop sending output
to the client in order to avoid crashing it.

To change this limit, set the config variable

`--ServerApp.iopub_data_rate_limit`.`

Current values:

ServerApp.iopub_data_rate_limit=1000000.0 (bytes/sec)

ServerApp.rate_limit_window=3.0 (secs)
